Reduction on production delays and more efficient work for Alde International with B1 Usability Package and Produmex Scan

Alde International Systems AB is a world-leading company, based in Sweden, which develops, produces and markets heating systems, mainly for mobile accommodation, for caravans and motorhomes. The company is privately owned and maintains clear, long-term emphasis on internationalization and product development.

Customer Challenges

- Previous legacy systems were outdated.
- Increased working hours for customer service personnel.
- Poor level of accuracy with day-to-day inventory transactions.
- Lack of visibility for production planning, causing production delays.

Solution

- Further extending of SAP software with B1 Usability Package and B1 Print & Delivery, to automate business processes more.
- Produmex Scan to scan barcoded items, allowing to instantly confirm inventory movements accurately.

Results

- A large gain in accuracy, functionality and speed across all the departments.
- Reduction on production delays and WIP because of less missing components.
- Working more efficiently with less time being spent manually entering inventory updates.
- Printing time is reduced significantly.

"IT'S DIFFICULT TO QUANTIFY THE EXACT % OF IMPROVEMENT BUT ACROSS ALL THE DEPARTMENTS THE USE OF SAP AND BOYUM HAS MEANT A LARGE GAIN IN ACCURACY, FUNCTIONALITY AND SPEED."

Mitesh Chotai / Finance Manager
