FEATURED PARTNER

MTC Information Technology

Guangxi Jianian Agriculture Co. Ltd established in 2012, is one of the earliest farms to venture into large scale commercial planting of dragon fruit. The farm practices state of the art production techniques and has received numerous awards at district, province and national level on the production of high-quality produce and various certifications pertaining to good agricultural practices, quality management, food safety and traceability system.

Customer Challenges

- Needed to add custom logic and validation control on the interface of B1 standard documents.
- Did not want to constantly modify custom add-on for the dynamic and changing business needs.
- Employees wasted time validating workflows and documents.

Solution

- B1 Usability Package is the most extensive development tool for SAP Business One.
- It provides the ability to easily validate documents and business processes without the need to write a custom code which is expensive to maintain.

Results

- Added filed and validation rules that has speed up the creation of document.
- Added mandatory fields to check the logic for key fields.
- Automatically generate documents based on custom business rules.
- Mass update of master data documents in a single click.

"THE ENHANCEMENT OF DOCUMENTS' AUTOMATIZATION AND BATCH OPERATION PROCESSING IMPROVED EFFECTIVITY AND ACCURACY GREATLY"

Annron Xiao, Consultant
