

Kenya Nut gained real-time visibility & improved its inventory control with Produmex Scan

Company: Kenya Nut
 Website: www.kenyanut.com
 Industry: Food Manufacturing
 Employees: 4000
 Partner: SEIDOR Kenya
 Solutions: Produmex Scan

Kenya Nut was established in 1974 in the Kenyan highlands with a focus on growing and processing quality macadamia and cashew nuts. Their product portfolio has since grown to include coffee, tea, chocolates, oil, wine, and beef, marketed under four brands: Out of Africa, Nutfields, Leleshwa, and Morendat. With over 4,000 employees, the Company operates seven farms on over 8,000 acres, with a complete production system that yields ready-for-sale products for both local and international markets.

“ Kenya Nut Management can now get accurate reports regarding stock and drive the business forward. ”

Steve Adewole,
 Head of IT

Challenges

- The manual inventory process lacked any control when issuing products from the warehouse.
- Lack of real-time updates when it came to inventory tracking.
- Delays in decision-making due to a lack of full traceability.
- Many errors during the picking process.

Solution

- Fully helped tackle their inventory control issues.
- Already integrated into SAP Business One and provides real time inventory data.
- An easy to adapt solution so their employees could get up to speed fast.

Results

- Gained real-time postings into SAP Business One.
- Inventory control is now at an optimum.
- The logistics department is now more productive.
