

Power Container Corp **gained efficiency, automation, and real-time visibility** with B1 Usability Package and B1 Print & Delivery

Company: Power Container Corp
 Website: www.powercontainer.com
 Industry: Manufacturing / Consumer Products
 Employees: 100
 Partner: Teamwork France
 Solutions: B1 Usability Package, B1 Print & Delivery

Power Container, Corp. (PCC) is a privately held organization in Somerset, NJ. They are a focused and dedicated manufacturer of pressurized airless dispensing systems for beauty & health, over-the-counter, household, and food products. As the only company specializing in PET pouch technology for airless and high-pressure dispensing for over 30 years, they provide reliable packaging solutions.

“ Thanks to B1UP, we were able to tailor the ERP to our specific needs and improve our efficiency. As a customer, one of the most empowering features of Boyum's B1UP and Print & Delivery solutions is the ability to develop our own customizations easily. This has given us unprecedented control and agility in adapting the software to our evolving business needs. Although we consult Teamwork for specific areas of expertise, they have been instrumental in ensuring that we maintain a high level of autonomy of the Power Containers customizations. It is this mix of customizable technology and this supporting partnership that makes our system an efficient and controlled system. ”

Olivier Bertaud / President

Challenges

- Get users to see the ERP not as a constraint, but as a tool to simplify their daily tasks, and as an analysis tool in which they can have confidence.
- Longer time allocated to the procedure and greater risk of erroneous data. Risk of lower user support for the solution.

Solution

- Data validations, & simplified data entry processes. Reducing the learning curve for their staff enhanced their productivity and improved the quality of their data.
- The menu customization helped them to perfectly integrate their custom report in the system to make them fully part of the final product for many users.
- Streamlined one of the most time-consuming aspects of their operations.

Results

- Improve the user-friendliness of the interface.
- Adapt certain transactions to the company's specific requirements.
- Automation of report generation & emailing.
- Time-saving for the production manager.
- Efficiency, effectiveness & easier access to reports and information.
