Beas Manufacturing, B1 Usability Package

FEATURED PARTNER

Seidor

For over 50 years, Risi SA, one of the leading Spanish manufacturers and distributors of appetizers, snacks, and chips, has produced over 8,000 tons of products and 350 million packages in 60 different formats annually. The company produces a wide variety of corn, rice, and wheat products, serving customers worldwide. These items are produced and stored in the company's factories and warehouses, covering over 40,000 sqm.

Customer Challenges

- Before implementing Beas Manufacturing, different systems ran parallel with data not integrated
- It was challenging to get KPIs in real-time because there was no unique data, and it was not integrated
- We were losing the traceability of the raw materials and scalability

Solution

- Beas Manufacturing implementation has completed the ERP change process, replacing the existing system to control the production processes.
- Full data integration into SAP Business One
- The ability to customize and enhance the functionality of SAP Business One

Results

- More control of the processes with real-time information to make quick decisions
- Cost control in the production process
- Traceability of raw materials and scalability

"AFTER IMPLEMENTING BEAS MANUFACTURING AND B1 USABILITY PACKAGE, WE HAVE GOT THAT ALL THE PROCESSES AND DEPARTMENTS ARE CONNECTED."

Javier Paniagua/ CIO

SAP Business One
