Chemicals

# Vesta Chemicals gained full traceability & visibility and improved its processes by 40% with B1UP & B1P&D

Vesta Chemicals, based in Zwolle The Netherlands, was established in 1988 as a distributor of specialty raw materials to the chemical industry. They are focused on catalysts and serve customers in a wide range of industries. They supply from their stock in Europe and the United States. They represent more than a dozen chemical manufacturers from both Europe and Asia. Most products they distribute are catalysts such as azo-initiators, organic peroxides, phase transfer catalysts, triphenylphosphine, and tin catalysts.

## Challenges

- Unknowledge of profit margin and problems on making decisions and future investments of missing information.
- Unable to fill all needed data in one system.
- Loss of time to analyze data.
- Many Excel sheets outside the old ERP-program.

## Solution

- Extra tabs and fields with data which are required for our company.
- Workflow guide for the internal processes.
- Dashboards, Mass delivery, Tabs and fields.

## Results

- Accurate financial and KPI data to measure and analyze the business and better decision making.
- Full traceability and visibility in one system allowing to manage the business processes.

“ Essential tool to fully connect your SAP program to the needs of your company. ”

*Harry Kleinsmit, Financial manager*
