FEATURED PARTNER

Vision33 UK

Flexicare Medical obtained **efficiency and automation in production processes** with Boyum Products

Flexicare is a leading UK manufacturer of medical devices. Backed by over 30 years of experience in design and development, and supported by a modern manufacturing facility, Flexicare has built a world-class reputation for the supply of medical devices. The company works with leading Universities, Teaching Hospitals, and Clinicians to develop ground-breaking products that advance the delivery of patient care and improve patient safety.

Customer Challenges

- Warehousing was a manual, paper-based process that was prone to error and delays.
- Lack of real-time information.
- Shipping errors, picking errors, and stock inaccuracy all lead to cost and less-than-expected levels of service.

Solution

- Stock accuracy.
- Automated processes.
- Efficiency gains.

Results

- Company growth.
- Customer service improvement.
- Reduction of manual effort.
- Warehouse, customer services, supply chain, and finance areas improved. Doubled in size over the project rollout.

"BOYUM PRODUCTS HAVE DELIVERED PRODUCTIVITY GAINS THAT ENABLED THE GROWTH OF FLEXICARE GLOBALLY."

Byron Scourfield / Supply Chain Director
