

Production planning and scheduling with SAP Business One and Beas Manufacturing

HEMO GmbH, based in Germany, is one of the leading manufacturers of parts cleaning systems. The solvent and hybrid cleaning systems, which are appreciated by renowned companies worldwide, are designed and manufactured at the company's headquarters. HEMO decided to use SAP Business One in combination with Beas Manufacturing because of its functional range. While the financial processes can be mapped in SAP Business One, the Beas Manufacturing add-on was used specifically for production planning and scheduling.

PARTNER

Columbus Systems GmbH

Customer Challenges

- ERP solution suitable for company size after merger
- Mapping of all business processes in ERP
- Increased efficiency by avoiding redundancies

Solution

- Complete mapping of all processes in SAP Business One Standard and Beas Manufacturing
- Columbus convinced with high professional competence and its practical implementation
- Future-proof and audit-proof of SAP Business One
- Flexible connection of third-party systems
- International orientation of SAP Business One

Results

- Less coordination effort with external auditors due to integrated financial accounting
- Increased efficiency in financial accounting
- International application
- Lean administration despite increase in turnover due to high degree of automation
- High acceptance by employees due to the simplicity and support

"WE WERE ABLE TO AUTOMATE MANY PROCESSES, WHICH SAVED A LOT OF TIME. THIS HAS ENABLED US TO OPTIMIZE INTERNAL WORKFLOWS AND TO KEEP OUR ADMINISTRATION LEAN, EVEN AFTER THE MERGER OF OUR TWO COMPANIES."

Andreas Fritz, Managing Director, HEMO GmbH
